Removal of old weathered cedar fencing on east side of property and connecting South corner, Approximately 45' ft x 5' ft on the East side and 9' ft x 5' ft on the connecting South corner. Approximately 3 pickets per foot equalling about 210 pickets total. This will require two team members 8 hours each for a total of 16 hours. 2 hours to demo existing fence and 4 hours each to install new cedar fence, rails and posts. We will also use one bag of high strength concrete per new post to ensure fence can withstand the elements. This will also include one large 16' ft x 6' ft gate that opens and closes as well as all necessary hardware to secure gate properly. The gate will span from connecting south corner to West side of house. We will finish with site walk with customer for final sign off and payment.
