QUALITY WORK. HONEST PRICE.

Scope of Work

1. Project Overview

This document outlines the scope of work for professional fence installation/replacement services. The project includes demolition of existing fencing (if applicable), site preparation, installation of new fencing materials, and all finishing work necessary to provide a secure, attractive, and durable fencing solution.

2. Detailed Scope of Work

2.1. Demolition and Site Preparation

- Safe removal and disposal of existing fence materials
- Post extraction and hole filling as required
- Property line verification and marking
- Utility location and marking (call before you dig)
- Site clearing and grading as necessary

2.2. Fence Installation

- Precise measurement and layout of fence line
- Post hole excavation to proper depth (typically 1/3 of post height)
- Setting posts in concrete for maximum stability
- Installation of rails, pickets, and hardware
- Gate installation with appropriate hardware and latching

2.3. Materials and Specifications

- 5-foot height specification
- Pressure-treated lumber for posts and structural components
- Galvanized or stainless steel fasteners for longevity
- Quality fence boards with proper spacing

3. Quality Standards

- All posts plumb and properly aligned
- Consistent height and spacing throughout
- Secure attachment of all components
- Clean, professional appearance

4. Project Completion

- Complete cleanup and debris removal
- Final inspection and client walkthrough
- Maintenance recommendations provided

5. Warranty

- 90-day warranty on installation workmanship
- Materials warranty as per manufacturer specifications
